

CONTENTS

■ Introduction.....9

■ Chapter 1 - General advice.....11

■ Chapter 2 - Elementary calculation.....15

- Number presentation: natural and relative numbers, real numbers
- Setting out addition, subtraction, multiplication and division
- When is a number divisible by another number?
- Prime numbers
- Associative law
- Distributive law and factorization
- Order of operations

■ Chapter 3 - Logic sequences.....39

- Arithmetic and geometric sequences
- Alternating operations
- Combination operations
- Cascade sequences
- Double operations
- Common properties

■ Chapter 4 - Equations.....51

- Solving an equation with one unknown
- Solving an equation with two unknowns

Chapter 5 - Orders of magnitude	59
• Simplifying calculations by using orders of magnitude	
Chapter 6 - Units of measure and conversions	63
• Converting units of measure (length, volume, mass, etc.)	
Chapter 7 - Fractions (part 1)	71
• Using fractions	
• Multiplying and dividing a fraction by a number	
• The principle of equivalence	
• Simplifying (or reducing) fractions	
Chapter 8 - Fractions (part 2)	81
• Adding and subtracting fractions	
• Fractions and percentages	
Chapter 9 - Fractions (part 3)	87
• Multiplying and dividing fractions	
• Comparing two fractions	
Chapter 10 - Powers	95
• Power of a number	
• Negative and zero powers	
• Calculating with powers	

Chapter 11 - Direct proportions..... 103

- Use of direct proportion
- The rule of three (or rule of proportionality) and the cross product

Chapter 12 - Inverse proportions..... 109

- Use of inverse proportion
- Linear product vs cross product

Chapter 13 - Calculating time..... 113

- Converting hours, minutes and seconds
- Adding and subtracting time

Chapter 14 - Travel problems..... 121

- Calculating speed, time and distance
- Reading distance tables

Chapter 15 - Distribution problems..... 127

- Reading distribution tables and graphs
- Relative difference

Chapter 16 - Rates of variation (part 1)..... 137

- Calculating a rate of variation
- Calculating final value
- Calculating initial value

■ Chapter 17 - Rates of variation (part 2).....	147
• Different types of variation table	
• Adding and subtracting rates of variation	
■ Chapter 18 - Simple averages.....	155
• Calculating simple arithmetic averages	
■ Chapter 19 - Weighted averages.....	159
• When are weighted averages used?	
• Calculating weighted averages	
■ Chapter 20 - Combinaisons.....	165
• Calculating the proportion of individuals associated with two or three criteria	
■ Chapter 21 - Revision.....	173
■ Explanatory answers.....	177
■ Glossary.....	281
■ Formulas.....	285
■ Pythagorean table.....	291
■ Who are we?.....	293
